

HealthAI Diagnostics

AI-Powered Radiology Diagnosis Platform

Series B Fundraising | October 2025

COMPANY

HealthAI Diagnostics Inc.

SECTOR

Healthcare AI / Medical Devices

FOUNDED

2022 | San Francisco, CA

STAGE

Series B Fundraising

TECHNOLOGY

Deep learning for medical image analysis

AI USE CASE

Computer vision for lung cancer and breast cancer detection from X-rays and mammograms

MEDICAL DEVICE CLASSIFICATION

FDA Class II Medical Device (510(k) cleared)

MARKETS

🇺🇸 United States (Launched 2023)

🇪🇺 European Union (Expansion Planned)

Product & Regulatory Status

CORE TECHNOLOGY

- Convolutional neural networks trained on 500,000+ medical images
- Computer vision algorithms for radiology image analysis
- 94% accuracy in lung nodule detection
- 91% accuracy in breast cancer screening
- Real-time diagnosis with 60-second analysis time

REGULATORY COMPLIANCE

- ✓ FDA 510(k) clearance obtained (2024) for US market - Class II medical device
- ✓ HIPAA-compliant infrastructure with end-to-end encryption
- ✓ Clinical validation completed at 12 US institutions
- ✓ CE marking application submitted for European Union market entry
- ✓ ISO 13485 certification for medical device quality management

Current Traction (US Market)

15	50K+	\$8M
HOSPITAL PARTNERS	SCANS PROCESSED	ARR

⚠️ Regulatory Expansion Strategy

EU Market Entry: Seeking CE marking under EU Medical Device Regulation (MDR) and compliance with EU AI Act high-risk classification for medical AI systems.

Target Markets: Germany, France, UK, Netherlands with established digital health reimbursement frameworks.

Series B Use of Funds: \$8M allocated to EU regulatory compliance, CE marking process, and GDPR-compliant data architecture.

International Expansion Strategy

Current Focus: US Market

- ✓ Medicare reimbursement approved
- ✓ \$5B serviceable market tapped
- ✓ 3.9X YoY growth momentum
- ✓ Strong unit economics proven

Phase 2: European Expansion (2026-2027)

Target Markets:

🇩🇪 Germany | 🇬🇧 UK | 🇫🇷 France | 🇳🇱 Netherlands

Strategic Rationale:

- Aging 65+ population growing faster than US
- Mature home care reimbursement infrastructure
- Digital health adoption accelerating post-COVID
- Regulatory framework established (EU AI Act, MDR)

Regulatory Pathway:

- CE marking application under EU AI Act (MDR)
- GDPR-compliant data architecture in development
- Partnerships with European home care networks

Series B Capital Allocation for EU Entry

\$8M

EU regulatory compliance & CE marking

\$5M

Market entry partnerships & pilot programs

\$3M

Product localization & data infrastructure

HealthAI Diagnostics

Expanded TAM: \$165B (US) → **\$280B (Global)**
